PREFACE

The Safety Management Information Statistics (SAMIS) 1995 Annual Report is a compilation and analysis of mass transit accident, casualty, and crime statistics reported under the Federal Transit Administration's (FTA's) National Transit Database Reporting System by FTA-funded transit systems in the United States during 1995.

This report was prepared under the sponsorship of the Federal Transit Administration, Office of Safety and Security. The statistics for the tables and graphs are generated by the SAMIS System Software, developed at the John A. Volpe National Transportation Systems Center (Volpe Center) in Cambridge, Massachusetts.

The authors wish to thank: Judy Meade, Director of the FTA's Office of Safety and Security; Carole Ferguson, Transit Safety Specialist at the Office of Safety and Security; William T. Hathaway, Senior Project Engineer at the Volpe Center; and David A. Knapton, Technical Task Initiator at the Volpe Center for their direction, guidance, and valuable comments during the preparation of this report.

NARRATIVE COMMENTS

INTRODUCTION

Now in its sixth year of publication, the Safety Management Information Statistics (SAMIS) report continues to provide uniformly-collected comprehensive safety data from approximately 400 transit agencies throughout the country¹. The 1995 SAMIS report has been significantly expanded. It now includes grade crossing accident data for light rail transit systems and security data for those agencies serving urbanized areas with populations of 200,000 or more. It is now possible to tell whether the victim of a crime or person involved in a safety incident was a patron or employee of the transit system, or neither.

The safety and security data presented in this report are collected via Form 405 of the Federal Transit Administration's (FTA's) National Transit Database Reporting System. To facilitate the reader's understanding of the information presented in this report, Form 405 is shown on pages 5 and 6. This information is collected separately for each transit mode an agency operates (e.g., an agency which operates bus and light rail will submit two Form 405s).

Transit safety data are collected in four basic categories: Collisions; Derailments/Buses going off road; Personal Casualties; and Fires. Each of these categories is further delineated in order to gather detailed information on the exact nature of the incident.

Transit security data are modeled after the Federal Bureau of Investigation's Uniform Crime Reporting System, using standardized offense definitions. Two types of security data are collected: report of Part I (crime index) offenses; and arrests for Part II (most other) offenses.

SAMIS reports safety and security statistics for the following transit modes: Motor Bus (MB); Automated Guideway (AG); Commuter Rail (CR); Heavy Rail (HR); Light Rail (LR); Demand Response (DR); and Vanpool (VP).

As with previous years' SAMIS reports, caution should be used when making comparisons across different modes of transit and when making comparisons against data from other reporting systems, such as those for aviation, trucking, and crime. For example, some transit modes run on exclusive rights of way while others mix with general traffic on surface roads. Some have extensive stations and terminals (where most

¹ Only data for *Directly Operated* transit modes are included here. Data for transit services under contract to recipients or beneficiaries of Section 9 funds, i.e. *Purchased Transportation* are not included in the calculations.

fires occur) with escalators (where many injuries occur) while others have no such facilities. When making comparisons with data from other reporting systems, it is important to consider that the reporting thresholds, assumptions, and definitions may be very different. For example, SAMIS reports property damage when the damage exceeds \$1,000, while other industries use thresholds that may be lower or higher.

NOTE: The 1990 and 1991 figures presented in this year's report may differ from their annual SAMIS reports due to the use of enhanced edit checking and correction criteria incorporated in the SAMIS System Software, which produces the statistics for graphs and tables. The software was applied retroactively to the 1990 and 1991 safety data so a meaningful comparison can be made across all years.

GLOSSARY OF TERMS

SAFETY DEFINITIONS

Vehicle Accident

An incident involving a moving vehicle. Includes collisions with another vehicle, object, or person (except suicides) and derailment/left roadway.

Passenger Accident

Same as Vehicle Accident, except that Personal Casualties incidents on the vehicle and entering/exiting the vehicle are also included.

Collision with Vehicle

An incident in which a transit vehicle strikes or is struck by another vehicle. Reports are made if the accident results in death, injury, or property damage over \$1,000.

Collision with Object

An incident in which a transit vehicle strikes an obstacle other than a vehicle or person (e.g., building, utility pole). Reports are made if the accident results in a death, injury, or property damage over \$1,000.

Collision with People

An incident in which a transit vehicle strikes a person. Except where specifically indicated, collisions with people do not include suicide attempts. Reports are made if the incident results in death, injury, or property damage over \$1,000.

Derailment/Left Roadway

A non-collision incident in which a transit vehicle leaves the rails or road on which it travels. This also includes roll-overs. Reports are made for all occurrences.

Employee

An individual who is compensated by the transit agency and whose expense is reported in object class 501 labor.

Fatality

A transit-caused death confirmed within 30 days of a transit incident.

Fire

Uncontrolled combustion made evident by flame and/or smoke which requires suppression by equipment or personnel. There are no thresholds; all fires are reported.

Grade Crossings

An intersection of highway roads, railroad tracks, or dedicated transit rail tracks that run either parallel or across mixed traffic situations with motor vehicles, light rail, commuter rail, heavy rail, trolleybus or pedestrian traffic. Collisions at grade crossings involving transit vehicles apply only to light rail, commuter rail, heavy rail or trolleybus.

Incident

Collisions, personal casualties, derailments/left roadway, fires, and property damage greater than \$1,000 associated with transit agency revenue vehicles and all transit facilities.

Injury

Any physical damage or harm to a person requiring medical treatment, or any physical damage or harm to a person reported at the time and place of occurrence. For employees, an injury includes incidents resulting in time lost from duty or any definition consistent with a transit agency's current employee injury reporting practice.

Passenger Miles

The total number of miles traveled by transit passengers (e.g., a bus that carries 5 passengers for a distance of 3 miles generates 15 passenger miles).

Patron

A person who intends to use or has used the transit system and is on property affiliated with the transit system within the limits of the law. An employee is not a patron.

Personal Casualty on Vehicle

An incident in which a person is hurt while on a transit vehicle, but not as a result of a collision, derailment/left roadway, or fire.

Personal Casualty Entering/Exiting a Vehicle

An incident in which a person is hurt while getting on or off a transit vehicle (e.g., falls or door incidents).

Personal Casualty Associated with Lifts

An incident in which a person is hurt while using a lift to get on or off a transit vehicle. This is a subset of the Entering/Exiting a vehicle in the Personal Casualty category.

Personal Casualty in Stations/Bus Stops

An incident in which a person is hurt while using a transit facility. This includes anyone on transit property but does not include incidents resulting from illness or criminal activity.

Personal Casualty Associated with Escalator

An incident in which a person is hurt while using an escalator in a transit facility. Any incident in this category is a subset of Personal Casualty in Stations/Bus Stops.

Personal Casualty Associated with Elevators

An incident in which a person is hurt while using an elevator in a transit facility. Any incident in this category is a subset of Personal Casualty in Stations/Bus Stops.

Suicide

A person ending his or her own life intentionally. This is a subset of Collision with People.

Transit Property

All facilities which are directly controlled by a transit agency or provided to a transit agency for its use. This includes stations, rights of way, bus stops, and maintenance facilities.

Transit Property Damage

The dollar amount required to repair or replace transit property damaged during an incident.

Vehicle Miles

The total number of miles traveled by transit vehicles. Commuter rail, heavy rail, and light rail report individual car miles rather than train miles for vehicle miles.

SECURITY DEFINITIONS

Part I Offenses (Reports):

Homicide

The killing of one or more human beings by another. This includes murder, non-negligent manslaughter and manslaughter by negligence.

Forcible Rape

The carnal knowledge of a female forcibly and against her will. This includes assault to rape or attempt to rape.

Robbery

The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. The use or threat of force includes firearms, knives or cutting instruments, other dangerous weapons (clubs, acid, explosives), and strong-arm techniques (hands, fists, feet).

Aggravated Assault

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.

Larceny/Theft

The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. This includes pocket-picking, purse-snatching, shoplifting, thefts from motor vehicles, thefts of motor vehicle parts and accessories, theft of bicycles, theft from buildings, theft from coin-operated devices or machines, and all other theft not specifically classified.

Motor Vehicle Theft

The theft or attempted theft of a motor vehicle. A motor vehicle is a self-propelled vehicle that runs on the surface of land and not on rails. Examples of motor vehicles are automobiles, trucks, buses, motorcycles, motor scooters, etc.

Burglary

The unlawful entry of a structure to commit a felony or a theft. This includes offenses known locally as burglary (any degree), unlawful entry with intent to commit a larceny or felony, breaking and entering with intent to commit a larceny, housebreaking, safe-cracking, and all attempts at these offenses.

Arson

To unlawfully and intentionally damage, or attempt to damage, any real or personal property by fire or incendiary device.

Part II Offenses (Arrests):**Other Assault**

An unlawful attack or attempt by one person upon another where no weapon was used or which did not result in serious or aggravated injury to the victim. This includes simple assault, minor assault, assault and battery, injury by culpable negligence, intimidation, coercion, hazing, and all attempts to commit these offenses.

Vandalism

The willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law.

Sex Offenses

Any sexual acts except forcible rape, prostitution, and commercialized vice. This includes offenses against chastity, common decency, morals, and the like, such as: adultery and fornication; buggery; incest; indecent exposure; indecent liberties; seduction; sodomy or crime against nature; statutory rape (no force); and all attempts to commit any of the above.

Drug Abuse Violations

Arrests requested based on the narcotics used. This includes all arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

Driving Under the Influence (DUI)

The driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Drunkenness

Arrests for all offenses of drunkenness which is the consumption of alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. This includes drunkenness, drunk and disorderly, common or habitual drunkard, and intoxication.

Disorderly Conduct

All charges of committing a breach of the peace. This includes: affray; unlawful assembly; disturbing the peace; disturbing meetings; disorderly conduct in state institutions, at court, at fairs, on trains or public conveyances, etc.; blasphemy, profanity, and obscene language; desecrating the flag; refusing to assist an officer; and all attempts to commit any of the above.

Trespass

To unlawfully enter land, a dwelling, or other real property.

Fare Evasion

The unlawful use of transit facilities by riding without paying the applicable fare.

Curfew and Loitering

All arrests for violations of local curfew or loitering ordinances where such laws exist.

TRANSIT MODE DEFINITIONS

AG - Automated Guideway

Consists of one or more automatically controlled vehicles operating on an exclusive guideway.

CC - Cable Car

Streetcar type of vehicles operating by means of an attachment to a moving cable located below the street surface and powered by engines or motors at a central location not on board the vehicle.

CR - Commuter Rail

Urban passenger train service for local short distance travel between a central city and suburbs. Commuter rail does not include heavy rail or light rail service. Service of a predominantly intercity nature is excluded, except where a local portion is operated under public agency contract for commuter purposes.

DR - Demand Response

Personal transit service operated on roadways providing service on demand. Vehicles are normally dispatched, and used exclusively for this service.

FB - Ferryboat

Vessels carrying passengers and/or vehicles over a body of water. The vessels are generally steam or diesel-powered conventional ferry vessels.

HR - Heavy Rail (Rapid Rail)

Transit service using rail cars powered by electricity which is usually drawn from a third rail and usually operated on exclusive rights of way. It generally uses longer trains and has longer spacing between stations than light rail.

IP - Inclined Plane

Special tramway type of vehicles operating up and down slopes on rails via a cable mechanism so that passenger seats remain horizontal while the undercarriage (truck) is angled parallel to the slope.

JT - Jitney

Passenger cars or vans operating on fixed routes (sometimes with minor deviations) as demand warrants without fixed schedules or fixed stops.

LR - Light Rail (Streetcar)

Urban transit which uses predominantly reserved but not always grade-separated rights of way. Electrically powered rail vehicles operate alone or in trains.

VP - Vanpool

Public sponsored commuter service operating under prearranged schedules for pre-formed groups of riders in 8- to 18-seat vehicles. Drivers are also commuters who receive little or no compensation besides free transportation and use of the vehicle during off hours.

MB - Motor Bus

Rubber-tired passenger vehicles that operate on roadways. Motor bus service implies fixed routes and schedules. The SAMIS graphs descriptions of Large Motor Bus (LMB), Medium Motor Bus (MMB), and Small Motor Bus (SMB) describe the size of the transit agency which operates the bus, not the size of the buses (i.e., if the number of buses an agency operates is greater than 500, then the vehicles are called LMB, if the agency operates less than 100 buses, they are called SMB, and anything in between is known as MMB). Therefore, in this sense of the division, LMB, MMB, and SMB are not true transit modes, but a representation of the agencies' sizes.

There are two reasons for this division:

- to reflect the differences in the operating environments and traffic mix.
- to have a meaningful comparison between motor buses and the rest of the transit modes [note that since motor buses constitute the majority of a transit agency's fleet, a chart comparing various combined statistics to the rest of the transit mode would result in a graph where the motor bus statistics would considerably dwarf the other transit modes].

The data for Trolleybus (TB) are combined with the Motor Bus data.

Transit modes whose statistics are insignificant when compared with other modes are addressed in an abbreviated fashion. They are Cable Car (CC), Ferryboat (FB), Inclined Plane (IP), and Jitney (JT). Detailed statistics are available on request. Monorail (MO), Publico (PB), Aerial Tramway (TR), and Other (OR) modes had no reportable incidents.

(All Modes Combined)

TRENDS

Vehicle Miles

by Year

Vehicles

by Year

Passenger Miles

by Year

Passengers

by Year

Incidents

by Year

Fatalities

by Year

Injuries

by Year

These graphs depict the trends for total number of *incidents*, *fatalities*, and *injuries* from all causes, i.e., **Collisions, Derailments, Personal Casualties, and Fires.**

Collisions*

by Year

* With Vehicle, Objects, and People (not including suicide attempts).

Derailments/Buses going off road

by Year

Personal Casualties*

by Year

* Personal Casualty is a type of transit mishap category where people are hurt but not as a result of Collisions, Derailments, or Fires. They occur on ROW, parking facilities, inside vehicle, entering/exiting vehicle & station/stops.

Fires*

by Year

* In vehicles, stations, right of way and others.

Vehicle Accidents

per 100,000 Vehicle Miles
by Year

This graph shows the accident rate which is based only on the number of **vehicle** accidents (incidents). These include all vehicle accidents resulting from **Collisions** [with vehicles, objects, people (not suicides)] and **Derailments** (vehicle derailed/left roadway). The vehicle mile figure includes both revenue and non-revenue miles since there are risks present during both types of operation. The three rail modes (commuter rail, heavy rail, and light rail) report car rather than train miles for vehicle miles.

Accidents

per 1,000,000 Passenger Miles
by Year

This graph shows the trend for the number of accidents (or incidents) resulting from **Collisions** [with vehicles, objects, and people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on the vehicle and entering/exiting the vehicle). When analyzing the results on this page, consider that the number of vehicle accidents, the number of passengers, and the average trip length all affect the accident rate. This graph differs from the Vehicle Accidents graph (previous graph) in that it includes **Personal Casualties** (on the vehicle and entering/exiting the vehicle), and is indexed in Passenger Miles.

Incidents

of all types
per 1,000,000 Passengers

Fatalities

from all causes
per 10,000,000 Passengers

Injuries

from all causes
per 1,000,000 Passengers

These graphs depict the trends for *incident*, *fatality* and *injury* rates, from all causes (except suicides), i.e., **Collisions, Derailements, Personal Casualties, and Fires.**

Entering/Exiting the Vehicle*

Injuries
by Year

* This is a sub-category of Personal Casualties.
It includes figures associated with Lifts.

Escalator Injuries

In Stations/Bus Stops*
by Year

* This is a sub-category of Personal Casualties.

Lift Injuries

While Entering/Exiting the Vehicle*
by Year

* This is a sub-category of Personal Casualties.

Suicides*

by Year

* Incidents of attempted suicides. These incidents include fatalities, injuries and the unharmed. This is a sub-category of collisions with people.

The 1995 SAMIS safety data presented as

GRAPHS

Accidents and Passenger Distribution by Transit Mode

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response

LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus

HR - Heavy Rail
LR - Light Rail
VP - Vanpool

The pie chart on the left shows the percentage of accidents (or incidents) reported for each mode. The Accidents include **Collisions** (not suicides), **Derailments**, and **Personal Casualties** (inside the vehicle, on right of way, and entering/exiting the vehicle) categories.

The pie chart on the right gives the percent of total transit ridership share held by each transit mode.

When compared, these pie charts provide another view of accident rates, e.g., with approximately 28% of transit passengers Heavy Rail has only 7% of the total accidents. If all transit modes were equally safe, the pie charts would be identical.

Incidents, Fatalities, Injuries by Cause

**Incidents
by Cause**

**Fatalities
by Cause**

**Injuries
by Cause**

☐ Collisions
 ☒ Derailment
 ☒ Personal Casualties
 ☒ Fires

The pie chart on the left shows the percentage of *incidents* from each cause (**Collisions**, **Derailments**, **Personal Casualties**, and **Fires**) to the total incidents from all causes.

The pie chart on the right shows the percentage of the *fatalities* and the pie chart in the middle shows the percentage of *injuries* from each cause (**Collisions**, **Derailments**, **Personal Casualties**, and **Fires**) to the total.

The *fatalities* chart shows that Collisions are the single most contributing cause of fatalities.

Collisions

Incidents, Fatalities, Injuries
by Type

The pie chart on the left shows the percentage of each type of *incident* resulting from **Collisions** (i.e., with other vehicles, objects, and people) to the total Collision *incidents*.

The pie chart on the right shows the percentage of *fatalities*, and the pie chart in the middle shows the percentage of *injuries* from each type of **Collision** (i.e., with other vehicles, objects, and people) to the total.

Comparing the three charts provides more insight into the causes of incidents, injuries, and deaths from **Collisions**.

Percentage of Collision Incidents at Grade Crossings to Total Collisions by Type

Percentage of Collision Fatalities at Grade Crossings to Total Collision Fatalities by Type

Percentage of Collision Injuries at Grade Crossings to Total Collision Injuries by Type

In each of the charts the pie on the left shows the percentage of **Collisions with other vehicles at grade crossings** to the total Collisions with vehicles. The pie on the right is the percentage of **Collisions with objects at grade crossings** to the total Collisions with objects. And the pie chart in the middle shows the percentage of **Collisions with people at grade crossings** to the total Collisions with people.

All three charts show a relatively low percentage of incidents, fatalities, and injuries at grade crossings.

Personal Casualties

Incidents, Fatalities, Injuries
by Type

The pie chart on the left shows the percentage of each type of *incident* in the **Personal Casualties** category [in parking facilities, inside vehicles, on right of ways, entering/exiting vehicles (associated with lifts), in stations/bus stops (associated with escalators, and associated with elevators)] to the total incidents of Personal Casualties.

The pie chart on the right shows the percentage of *fatalities*, and the pie chart in the middle shows the percentage of *injuries* from each of these incidents.

Fires

Incidents, Fatalities, Injuries by Type

* There were two fatalities from Fires.

The pie chart on the left shows the percentage of each type of **Fire incident** (in vehicles, in stations, and on right of way and others) to the total incidents of Fires.

The pie chart on the right shows the percentage of *fatalities*, and the middle one shows the percentage of *injuries* from each type of Fire incident to the total.

Comparing the three charts provides more insight into the types of Fires and the causes of injuries and fatalities from them, e.g., a fire inside the vehicle (the smallest percentage of the fire incidents) resulted in more injuries (and one fatality) than a fire on the road or in a station/bus stop.

Vehicle Accidents

per 100,000 Vehicle Miles

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response
LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus
HR - Heavy Rail
LR - Light Rail
VP - Vanpool

This graph shows the accident rate which is based only on the number of vehicle accidents. These include all vehicle accidents resulting from **Collisions** [with vehicles, objects, people (not suicides)] and **Derailments** (vehicle derailed/left roadway). The vehicle mile figure includes both revenue and non-revenue miles since there are risks present during both types of operation. The three rail modes (Commuter Rail, Heavy Rail, and Light Rail) report car rather than train miles for vehicle miles.

Accidents

per 1,000,000 Passenger Miles

AG - Automated Guideway LMB - Large Motor Bus HR - Heavy Rail
CR - Commuter Rail MMB - Medium Motor Bus LR - Light Rail
DR - Demand Response SMB - Small Motor Bus VP - Vanpool

This graph shows the number of accidents (or incidents) resulting from **Collisions** [with vehicles, objects, and people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle). When analyzing the results on this page, consider that the number of vehicle accidents, the number of passengers, and the average trip length all affect the accident rate. This graph differs from the previous page in that it includes **Personal Casualties** (inside the vehicle, and entering/exiting the vehicle), and is indexed in Passenger Miles.

Fatalities

per 10,000,000 Passenger Miles

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response
LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus
HR - Heavy Rail
LR - Light Rail
VP - Vanpool

These statistics represent *fatalities* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle).

Injuries

per 1,000,000 Passenger Miles

AG - Automated Guideway LMB - Large Motor Bus HR - Heavy Rail
CR - Commuter Rail MMB - Medium Motor Bus LR - Light Rail
DR - Demand Response SMB - Small Motor Bus VP - Vanpool

These statistics represent *injuries* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle). This chart may be compared with Accidents and Fatalities (two previous graphs) to get a feel for the probability of dying or being injured in an accident.

Incidents

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response

LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus

HR - Heavy Rail
LR - Light Rail
VP - Vanpool

These graphs depict the *incident*, *fatality*, and *injury* rates, from all causes (except suicides), i.e., **Collisions, Derailments, Personal Casualties, and Fires.**

Collisions

per 1,000,000 Passengers

This graph shows the rates of *incidents*, *injuries*, and *fatalities* (except suicides) for the **Collisions** category of Form 405.

The rates show how often incidents, fatalities, and injuries occur, based on passenger exposure to risk. These rates should be considered when looking at the Collision figures (stacked bar charts on next page) which provide only raw numbers. The raw numbers alone do not provide a full picture of relative safety without data on exposure which is provided here.

Incidents of Collision

AG - Automated Guideway

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response

LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus

HR - Heavy Rail
LR - Light Rail
VP - Vanpool

These graphs break down by type *incidents*, *injuries*, and *fatalities* resulting from **Collisions** (with vehicles, objects, and people).

Not surprisingly, most of the fatalities are the result of collisions with people.

Personal Casualties

per 1,000,000 Passengers

This graph provides the rates by transit mode for *incidents*, *fatalities*, and *injuries* classified under the **Personal Casualties** category of Form 405. Keep in mind that **Personal Casualties** is a transit mishap category where people are hurt but not as a result of Collisions, Derailments, or Fires. The rates show how frequently incidents, deaths, and injuries occur, based on passenger exposure to risk. These rates should be kept in mind when looking at the Personal Casualties figures (stacked bar charts on next page) which provide only raw numbers. The raw numbers alone do not provide a complete picture of relative safety without data on exposure (provided here).

Incidents of Personal Casualty

AG - Automated Guideway
CR - Commuter Rail
DR - Demand Response

LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus

HR - Heavy Rail
LR - Light Rail
VP - Vanpool

These graphs break down by type *incidents*, *injuries*, and *fatalities* that are classified under the **Personal Casualties** category of Form 405 [in parking facilities, inside vehicle, on right of way, entering/exiting the vehicle (associated with lifts), in station/bus stops (associated with escalators, and associated with elevators)].

Keep in mind that **Personal Casualties** is a transit mishap category (in Form 405) where people are hurt but not as a result of Collisions, Derailments, or Fires.

LMB - Large Motor Bus
MMB - Medium Motor Bus
SMB - Small Motor Bus

HR - Heavy Rail
LR - Light Rail
VP - Vanpool

These graphs break down by type the *incidents*, and the resulting *fatalities and injuries*, from **Fires** (in vehicles, in stations, and on right of way/road and others).

While there were relatively few incidents of Fires, the graph clearly shows that the vast majority of such incidents occurred in heavy rail stations and right of way.
